

Dear Valued Partner,

At Actylis, we know that today's life sciences and advanced technology markets demand more than just reliable supply - they demand solutions that actively support your business objectives while protecting our planet for future generations.

As we continue to grow as a global leader in the manufacturing and sourcing of critical materials and ingredients, sustainability is at the heart of how we operate and how we deliver value to you. Our purpose has always been clear: Unique Supply. Simplified. That means taking the complexity out of managing essential materials, providing agility and security across our supply network, and doing so in a way that meets the highest environmental and regulatory standards.

We understand that sustainability is not only a responsibility but also a key driver of your long-term success. That's why we've embedded robust environmental, social, and governance practices into every level of our business ... from sourcing and packaging to reducing our operational footprint and promoting more sustainable manufacturing practices. Our Gold EcoVadis rating, achieved for two consecutive years, reflects the depth of this commitment and places us among the top 5% performers in our industry.

You can be confident that when you partner with Actylis, you are working with a supplier who not only delivers the quality, compliance, and responsiveness you need, but also shares your commitment to advancing sustainability. Together, we can reduce waste, optimize resources, and meet the evolving expectations of customers, regulators, stakeholders, and the communities we serve.

Thank you for trusting Actylis to help power your business. We look forward to continuing to simplify your supply chain, strengthen your operations, and shape a more sustainable future ... together.

Warm Regards,

Scott Thomson

Chief Executive Officer
